**Subject:** Two abreast riding

Please do not pass the bill about 2 riding abreast of each other , of course if cars are coming they should be single file and on busy streets.but on empty streets why wouldnt it be fine? Also there is bike lingo like " car back" car front etc.. I think what would be a great idea would be to have every cyclist have a card that says they took a bicycle safety course .this way if they get in trouble for not obeying the rules its there own fault what do you think?
